

## **Chemical Management Policy- *Follow Up Questionnaire***

**March 5, 2004**

Has your school found alternatives for and/or reduced the amount of hazardous materials purchased or stored?

Has the storage of hazardous materials at your school improved?

Are there training procedures in place to educate staff in proper spill procedures and management of hazardous waste?

Are material safety data sheets being filed for all chemicals in your school? (NHPPP recommends a copy be kept in principal's office and in the applicable storage areas.)

Have mercury containing compounds and devices (including thermometers) been properly removed from your school? If so, when?

What sorts of problems have surfaced in the process of trying to follow through with your adopted chemical management policy, and how are they being handled?

What questions or comments do you have for NHPPP?

Thank you for completing this questionnaire!
